T-Mobile**

What you need to know

- Allow 3 Weeks prior to installation to order and receive your material.
- An order will need to be placed per shipping address. You may "batch" your orders for multiple locations, but they must all ship to a single location.
- Once you place your order an invoice will be e-mailed to you. Payment options are, Credit Card (2.75% fee), check by mail or ACH. You can also [request a line of credit](#).
- Once payment is received, within 24 hours you will receive an order reference number and estimated deliver schedule. Tracking information will be provided along with receiving guidelines.
- You may receive a call prior to delivery to confirm the delivery arrangements. Please note it could take 5-10 business days form payment to delivery.

How do I pay?

- 1) ACH Payment
- 2) Credit Card
- 3) [Request a Line of Credit](#)

Floor Preparation

- Floor preparation is key to a successful outcome. Ridges and gaps may “profile” through and be visible on the surface. Get your subfloor smooth.
- Concrete subfloors are like a sponge and contain moisture. It is important to know the amount of moisture in your subfloor to insure a successful outcome. If your moisture reading is high (> 95% rH), contact T-Mobilesupport@mohawkind.com.
- It is extremely important to acclimate the LVT and carpet tile in the space for **48 hours prior to installation**.
- The front of house LVT is from a unique category called Hot & Heavy. Hot & Heavy is a loose lay installation requiring adhesive only around the perimeter of the area. In some cases, the installer may apply a “grid” of adhesive on the floor (a band of adhesive is applied on a 20-foot grid). It is okay to apply adhesive in 100% of the area, but it is not needed for a successful installation (unless there is high subfloor moisture). Full application of the adhesive may make replacement of a plank more difficult.
- Walk-Off material will require a full spread application of adhesive. Walk Off material should be installed next to the LVT. Transition strips are needed around the perimeter of the Walk Off. For safety reasons, **DO NOT INSTALL THE WALK OFF ON TOP OF THE LVT!** Most stores will require 1 carton of material. If you have two sets of double doors, a second carton may be needed.
- You should leave a 1/8” gap around the perimeter to allow for potential material expansion.

MOHAWK RECOMMENDS...

Your installation professional should provide you with your quantity estimate. Have the installer tell you how much material you need. Consider having a little extra material for repairs.

Material Units of Measure:

- Carpet, walk-off, sheet vinyl = square yards
- LVT = square feet
- Unit Conversions
 - Square foot = square yard / 9
 - Square yard = square foot x 9
